Download NodeJS and VS Code

Npm -g create-react-app

Command Line(terminal):
```
npx create-react-app my-app
cd my-app
npm i --save react-router
npm i --save react-router-dom
npm i --save @fortawesome/fontawesome-svg-core
@fortawesome/free-solid-svg-icons @fortawesome/react-fontawesome
npm i --save bootstrap
npm i --save reactstrap
```

To view:
Cd app-name
Npm start

For reactstrap to work, we also need to import Bootstrap CSS into our `src/index.js`:

```
import 'bootstrap/dist/css/bootstrap.min.css';
```
